EDUCATION

- RPTU Kaiserslautern-Landau** Kaiserslautern, Germany
Master of Science - Computer Science October 2024 - Present
- MIT School of Engineering, MIT ADT University** Pune, India
Bachelor of Technology - Computer Science and Engineering; GPA: 8.17 August 2019 - July 2023

SKILLS SUMMARY

- Languages:** JavaScript, Python, Java, C, C++, SQL, noSQL,
- Frameworks:** nestJS, nextJS, Spring, Scikit, openCV, keras, TensorFlow
- Frontend:** HTML, CSS, ReactJS
- Backend:** NodeJS, JSp, Servlets, MySQL, MongoDB, PostgreSQL, AWS S3
- Tools:** GIT, PM2, AWS, GCP, Firebase, Auth0

EXPERIENCE

- Elitist Software Solutions** India
NodeJS Developer (Full-time) August 2023 - Present
 - Built **real-time systems** for **price data streaming**, **web scraping**, **music streaming**, and **project management**, improving **scalability** and **performance**.
 - Migrated services from **NodeJS** to **NestJS**, enhancing **code maintainability** and **deployment efficiency** across production systems.
 - Architected **database integrations** (**InfluxDB**, **PostgreSQL**, **MongoDB**), boosting **query performance** by **25%-45%**.
 - Designed **real-time socket communication systems** and scalable **AWS infrastructure** (**S3**, **EC2**, **SQS**), ensuring **high availability** and **fault tolerance**.
 - Strengthened system **security** and user engagement by developing **authentication** and **notification services** with **Firebase**.

PROJECTS

- Real-time Price Data Application:** Developed a real-time price data application optimized for **low latency** and **high scalability**. Migrated from NodeJS to NestJS to enhance **maintainability**, integrated **InfluxDB** for real-time data storage, and **PostgreSQL** for user data. Utilized **AWS S3** for file storage and integrated **dynamic charts** on the frontend. Enabled **real-time updates** with socket-based communication. **Technology:** NodeJS, NestJS, InfluxDB, PostgreSQL, Redis, AWS S3
- Web Scraping Application:** Refined and optimized a web scraping application for e-commerce product data extraction. Resolved critical bugs, ensuring **100% data retrieval success**. Implemented error management, retry mechanisms, and GPT-based title generation for **enhanced accuracy**. Reduced external scraping costs by over **100%** through **optimization**. **Technology:** NestJS, TypeScript, PostgreSQL, AWS SQS
- Social Media Application:** Developed a social media app with **user authentication**, **real-time notifications**, and **API management** for user interactions. Integrated **Firebase** for notifications, designed secure APIs for user management, and implemented **socket services** for **real-time event handling**. Utilized **MongoDB** for scalable data storage and **AWS S3** for multimedia content management. **Technology:** NodeJS, JavaScript, MongoDB, Firebase, AWS S3
- Project Management Tool:** Engineered a comprehensive project management tool with **task tracking**, **time management**, and **communication features**. Developed APIs for task management, integrated **email/WhatsApp notifications**, and implemented a scalable data structure using **MongoDB** and **Firebase**. Deployed on **AWS EC2** for secure operation. **Technology:** NodeJS, JavaScript, MongoDB, Firebase, PM2, AWS EC2, AWS S3
- Content Management System:** Developed a CMS using Node.js, EJS, and MongoDB with **role-based access control** (admin/user), **JWT authentication**, and **secure data management**. Enabled admins to create, edit posts, and manage users. **Technology:** NodeJS, JWT, JavaScript, EJS, CSS, MongoDB
- ColdTube:** Developed a YouTube clone using React and Redux, integrating the YouTube API for video streaming. Implemented features like **shimmer effect**, **debounced search**, **nested comments**, and **live chat** for an engaging user experience. **Technology:** ReactJS, Redux, JavaScript, Tailwind CSS
- Hospital Management System:** Hospital Management System is a web-based application designed to assist in the management of hospital operations, such as patient management, doctor management, appointment management, and patient record management. The application follows the **Model-View-Controller architecture** and is built with the **Maven tool**. **Technology:** Java, JSP, Servlet, SQL, MySQL, HTML, Bootstrap

CODE SPACE AND LANGUAGES

- Languages:** German (A2), English (C1)
- Solved **300+** problems on LeetCode, ranking in the top **3%** globally for solution performance. ([Leetcode Profile](#))
- Achieved an overall coding score of **611** on GFG, solving **265+** problems. ([GFG Profile](#))
